

# LOCK'ER<sup>®</sup> DOWN

## INSTALLATION INSTRUCTIONS

### LD3043

[Model 2007 to 2021 Toyota Tundra Double Cab]

1. For any combination style lock, it is a good idea to set the combination before installing the safe. We recommend that the combination be set with the **DOOR OPEN** in order to test the lock combination effectively without locking yourself out.
2. Make sure that the rear seats are in the upward position.
3. Place the safe where the undercarriage of the rear seats is. The larger section of the safe goes on the driver's side rear.
4. Insert the **LOCK'ER DOWN PROVIDED BOLT AND WASHER** through the factory seat frame holes and through the slotted holes in the safe
5. Secure the bolt and washer with the **LOCK'ER DOWN PROVIDED NUTS** from the inside of the safe.
6. Tighten the nuts, **DO NOT OVER TIGHTEN, THIS COULD DAMAGE THE SAFE OR THE VEHICLE.**
7. Enjoy your purchase!
