

LOCK'ER[®] DOWN

Security Products

Instructions for Model 2018

1. If you have a combination lock, it is easier to set the combination before installing the safe.
2. Open console and remove the three screws in the floor of console.
3. Place the front plate inside the console with the studs up but do not attach fasteners.
4. Put the lid assembly in as shown in Fig 1, turn and pull up to top.
5. Install the flange nuts attaching the top to the front bracket to hold the top in place.
6. With the lid open, place the back bracket to the top plate with two flange nuts.
7. Insert the three provided screws to hold the front and rear brackets to the console floor.
8. Now tighten the four flange nuts and you are done.
Enjoy your purchase.

**See back for USB
Extension
installation.**

Top Assembly

Front Plate

Rear Plate

1. Use the included tool to remove the USB receptacle.
2. Unplug the cable from the rear.
3. Plug the included extension cable into the vehicle harness and route it
Either inside the safe or outside, your preference.
