Never put a loaded gun in a Rugged Gear Gun & Utility Holder!

The Rugged Gear Dual-Lock™ Gun & Utility Holder provides a semi-permanent mounting system to hold your firearms and tools. This holder offers a unique removable feature, eliminating the need for screws or bolts, yet supplying a strong and long-lasting hold. Dual Lock can be mounted to most hard, smooth surfaces.

The unique 3M Dual Lock tabs incorporate hundreds of mushroom-shaped stems that snap into place for incredible continuous holding power — five times greater than hook-and-loop fasteners — in all weather and over all terrain!

The Patented Rugged Gear Adjustable Hook System

Indestructible, flexible aluminum hooks adjust wider or narrower to custom-fit and grip items up to 6 1/2" deep. Soft Neoprene covering won't mar equipment.

Super-strong Velcro® strap fastens around hook and item for a secure hold; eliminates all movement and wear.

Removable rubber Barrel Holders (included) insert into hook to hold smaller items such as gun barrels.
